GI Revolution 2025

Breakthroughs in IBD, Liver Disease, and Gastrointestinal Oncology

Tentative Progrm

Day 1 – Focus: Inflammatory Bowel Disease and Liver

Disorders

08:00 - 09:00

Registration and Welcome Coffee

09:00 - 09:15

Opening Remarks

09:15 - 10:00

Keynote Lecture: Transforming IBD Care – From

Biologics to Personalized Therapy

10:00 - 11:00:

Scientific Session 1: IBD Pathogenesis and the

Microbiome

11:00 - 11:15: Coffee Break

11:15 - 12:15

Scientific Session 2: Advances in Clinical Management of

Ulcerative Colitis and Crohn's Disease

12:15 - 13:30

Networking Lunch

13:30 - 14:30

Scientific Session 3: Viral Hepatitis B & C - Global

Elimination Strategies

14:30 - 15:30

Scientific Session 4: Autoimmune Liver Diseases –

Diagnosis and Treatment Advances

15:30 – 15:45: Coffee Break

15:45 - 16:45

Oral Abstract Presentations – Liver Health Track

16:45 - 17:30

Panel Discussion: Tackling NAFLD and the Global

Liver Disease Burden

Day 2 - Focus: Gastrointestinal Oncology and

Innovation

08:30 - 09:00

Morning Coffee and Networking

09:00 - 09:45

Keynote Lecture: The Evolving Landscape of GI

Oncology - From Bench to Bedside

09:45 - 10:45

Scientific Session 5: Advances in Colorectal and

Pancreatic Cancer

10:45 – 11:00: Coffee Break

11:00 - 12:00

Scientific Session 6: Innovations in Endoscopic

Diagnostics and Imaging

12:00 - 13:15

Poster Viewing and Networking Lunch

13:15 - 14:15

Scientific Session 7: Immunotherapy and Targeted

Agents in GI Oncology

14:15 - 15:15

Oral Abstract Presentations – GI Oncology Track

August 28–29, 2025

Dubai, UAE

15:15 - 15:30: Coffee Break

15:30 - 16:30

Scientific Session 8: Artificial Intelligence in GI Cancer

Detection and Surveillance

16:30 - 17:00

Closing Panel Discussion: Future Frontiers in Digestive

Health

17:00 – 17:15: Closing Remarks and Awards

The preliminary agenda for GI Revolution 2025, scheduled for August 28–29 in Dubai, offers a comprehensive exploration of gastrointestinal health—from the stomach and intestines to the liver and pancreas. Day 1 will address key issues in inflammatory bowel disease (IBD), intestinal and hepatic disorders, including Crohn's disease, ulcerative colitis, hepatitis, and autoimmune liver diseases. Day 2 will spotlight gastrointestinal oncology, covering gastric, pancreatic, and colorectal cancers, alongside sessions on cutting-edge diagnostics, endoscopy, and AI in cancer detection. With a balanced mix of keynote lectures, expert sessions, oral presentations, and panel discussions, the event will foster deep scientific exchange across the full spectrum of GI diseases and innovations.

Register before the early-bird deadline and receive 1-day complimentary accommodation at our venue hotel!
